SUMMARY

Lead Backend Engineer and Java backend developer with 6+ years building Spring Boot microservices on AWS for telecom, banking and insurance. Designed the service that moved a global telecom's agent and store channels onto a digital order journey, lifting order volume by 30%+. Brings agentic AI and LLM integration into Java backends, and designs scalable distributed systems for high concurrency, idempotency and event driven messaging with Apache Kafka.

TECHNICAL SKILLS

Languages: Java (8, 17, 21, 25), SQL, Python
Frameworks: Spring Boot, Spring MVC, Spring WebFlux, Spring Security, Spring Data JPA, Hibernate, Spring AI
Architecture: Microservices, Distributed Systems, System Design, Event Driven Architecture, REST APIs, GraphQL, Concurrency, Multithreading, Idempotency, Saga, Transactional Outbox, Caching, Rate Limiting
Data and Cloud: PostgreSQL, MySQL, MongoDB, Redis, Apache Kafka, AWS (ECS, EC2, S3, Lambda, CloudWatch), Docker, CI/CD, Maven, Git
Generative AI: LLM Integration, Agentic AI, Claude, Spring AI, Prompt Engineering, Model Routing, AI Gateway
Testing: JUnit 5, Mockito, Testcontainers, k6, Test Driven Development (TDD)

PROFESSIONAL EXPERIENCE

Lead Software Engineer | Bounteous (formerly Accolite Digital) | Remote — Jan 2024 to Present

- Designed and built Omni Context Service, a Java 21 Spring Boot microservice on AWS ECS with MongoDB and Amazon S3 that connects legacy agent channels (Salesforce agent desktop, ServiceNow, retail stores) of a global telecom to its digital Omni order journey through one create session REST API, lifting order volume by 30%+ within 3 months.
- Built agentic AI proofs of concept on order data with Claude LLMs, routing each task to a model sized for it: a management dashboard that tracks orders end to end with drill down to pain points, and an agent incentive leaderboard with progress tracking and follow up reminders.
- Designed microservices serving 10M+ API requests a month and built REST and GraphQL APIs that made order processing 35% more efficient; moved peak flows to Spring WebFlux, absorbing a 50% traffic increase.
- Automated workflows over 1M+ records on AWS and MongoDB, cutting manual effort by 40% across business lines.
- Lead the backend team's deployments, code reviews and production troubleshooting, and improved the CI/CD pipeline.

Associate Consultant | Infosys | Kolkata — May 2023 to Jan 2024

- Developed Java and Spring Boot backend services for core banking operations of a major private sector bank.
- Built an internal automation tool that removed 40% of the development team's repetitive work, and helped raise end user satisfaction by 40%.

Systems Engineer | Tata Consultancy Services (TCS) | Kolkata — Aug 2020 to May 2023

- Migrated legacy life, annuity and pension systems covering 6M+ policies for UK insurance brands onto TCS BaNCS Insurance (Java, Spring, SQL).
- Cut development time by 20% and improved application performance by 30%; mentored and led junior developers through the full SDLC.

PROJECTS

Ledgerline | *Java 25*, *Spring Boot 4*, *PostgreSQL*, *Kafka*, *Testcontainers* — github.com/SouradipG/ledgerline

- Double entry payments ledger with idempotency keys, transactional outbox to Kafka and a payout saga with reconciliation; concurrency tests prove zero double spends (200 parallel debits, exactly one succeeds) and zero deadlocks.

Surge | *Java 25*, *Spring Boot 4*, *Redis*, *PostgreSQL*, *Lua*, *k6* — github.com/SouradipG/surge

- Flash sale backend with a virtual waiting room, atomic Redis Lua stock reservation, distributed rate limiting, load shedding and cache stampede protection, guaranteeing zero overselling under traffic spikes.

Relay | *Java 25*, *Spring Boot 4*, *Spring AI*, *MongoDB*, *Redis* — github.com/SouradipG/relay

- Multi tenant LLM gateway with SSE streaming, per tenant token budgets, provider failover behind circuit breakers, fair scheduling and leased background jobs with signed webhooks.

EDUCATION

B.Tech, Computer Science and Engineering | Narula Institute of Technology, Kolkata — Aug 2016 to Jul 2020

CERTIFICATIONS AND AWARDS

- Claude Certified Architect, Foundations (Anthropic, 2026); OCI Generative AI Professional (Oracle); Programming, Data Structures and Algorithms using Python (IIT, NPTEL)
- Emerging Icon and Extra Miler (Accolite Digital); Star of the Month, On the Spot and Best Team (TCS)
